

# ...the fastest amplifier in the world

The ingenious circuitry of  
Julius Futterman as modern interpretation.  
**OTL-Output Transformerless.**

Technical Data	
Max. Output Power	30 watts per channel @ 8 ohms 55 watts per channel @ 16 ohms 100 watts @ 8 ohms (bridged)
Frequency response (-3 dB)	20 - 130.000 Hz
Signal-to-noise-ratio (A)	106 dB
Damping factor (100 Hz, 1 w, 8 ohms)	35
Input impedance	10 k ohms
Weight	16 kg

(Changes without notice.)

The amplified signal of the  
electron tube is directly trans-  
mitted to the speaker cabinets  
– without a detour through  
hundreds of meters of copper  
wire wound on iron cores.  
Everyone who ever experi-  
enced this, will not let the  
amplifier go anymore.
